

Customer Spotlight

TERCO

Construction LLC

“We have purchased multiple machines from Hoffman over the years, including skid steers, backhoes, wheel loaders and excavators. TERCO currently operates a JCB 300T skid steer, a Doosan Mega 200 wheel loader, and a Doosan 140 LC excavator that were all bought from Hoffman. About 90% of the equipment we acquire is from Hoffman, and that equipment serves us well in developing and expanding our business.

“We also rely on Hoffman for our parts and service, including service on machines we purchased from a different distributor. Hoffman’s service is excellent, and we have never had a problem with them. We have been doing business with Hoffman since 2011, and we are extremely impressed with the level of attention and service we have received.”

—**Scott Hendricks**

Director of Operations, TERCO Construction LLC

About TERCO Construction LLC

TERCO Construction is a second generation certified commercial construction company providing design/build services, including in-house project managers and job superintendents. They specialize in excavation and construction for commercial and municipal projects.
