Paving Solutions, Inc.

"I would definitely recommend Hoffman"

The Best Machines

"I have purchased multiple pieces of equipment from Hoffman over the years, including pavers, skid steers, and an excavator. LeeBoy and CASE are pretty much the only two brands we buy. LeeBoy makes the best machines for road and highway paving, which is our main line of work. Recently, we started doing full site development in addition to paving, which is why we went to Hoffman for the CASE 225 excavator.

"We have also purchased a variety of attachments for our equipment from Hoffman. I just bought a sweeper attachment for our skid steer, and previously purchased milling attachments and a hammer for our excavator."

Excellent Customer Service

"We have been a customer of Hoffman's since they opened their location in Marlboro, NY. They treat us well at that location, and we have had a long relationship with them. Hoffman's customer service and reliability are big for me. When we recently purchased the CASE 225 excavator, we wanted to include a used hammer attachment with it. The deal they offered us was great. Unfortunately, before the purchase was finalized, another location had sold the hammer attachment without realizing that it was part of our deal. Mike and Dave went out of their way to honor the original deal and gave me a brand new hammer for almost the same price as the used one. I would definitely recommend Hoffman to others in my industry."
