

Rental Cranes

For Projects Throughout New York

Reliable Brands

"We mostly rent, but we will occasionally purchase cranes from Hoffman Equipment for the work that we do. We most often use cranes from the Manitowoc and the Grove lines. The Grove RT600 and the Manitowoc 888 are the mainstays of our crane fleet. We've used these cranes for many years because we tend to standardize our equipment and prefer to stay with the brands that have been reliable."

Responsive Service

"Hoffman Equipment has been our regional dealer for the past five years. They offer the products that we need, and have quality technicians that perform quality work when we need it."

"Over the years, Hoffman's service has always been excellent. They respond to our needs very quickly. If they are unable to do something or don't have the answer, they reach out to the manufacturers immediately and get what we need. Andy Schultz, my salesman at Hoffman, and Stan Ford, Hoffman's service manager, have always been extremely helpful."

"In my experience, the parts and service departments have always been very good. They provide excellent turnaround time with any project we give them."

About Yonkers Contracting Company, Inc.

Edward J. Petrillo founded Yonkers Contracting Company in 1946. The company is now run by Edward's son, Carl E. Petrillo, who is currently the President and CEO. The company is a general contractor in the New York metropolitan area. They focus on transportation projects, such as highways, bridges, and intermodal facilities, and developments in the following areas: energy and environmental, water and wastewater, and commercial construction.
